Lighting Street lights

The lights can move into any position. Also the lights go up. When it is foggy it can bend so you can see where you're going. The light can be dim at night and it gets the power from the sun. Also it can go into any position. The lights can dim.

We've done Yasemin.
A super idea for a new design of street light.

Dear councillors

In class 2 we have been **designing** ideas for the new street. ALSO I have thought of some things to put in E Ukesley. There is a indoor play area, new park, shops and other stuff. I hope you listen to this and we need these things because it isn't that exciting. They might like the park but people who aren't allowed to play out its not fair on them. So if you choose to ^{do} that it would be most kind. We have also thought of over lights and roads for the lights we've thought we should put lights on the wall and make a swirly one which can be on and its got lights

Yasemin 2

up and down. And for the road we think you should make cycling path. Also for people who can't read we think you should draw the picture on it so they know where their going.

Excellent ideas Yasemin,

you have put your points across clearly and made excellent use of punctuation.

Your lamp post design was very exciting and showed a lot of thought.
Well done!

Jake

Cars ~~over~~ our new street
will be electric cars.
Performance cars can kill people.

Children the fumes are
poisonous and the cars are
very fast. ✓

Dear Councillors,

In class 2 we have been discussing ~~ideas~~ ^{ideas} for the E Kesley ^{the} future with walls with L.E.D.s. I personally suggest you add some ^{zebra} ~~zebra~~ crossings

and traffic lights also another shop.

To conclude ~~I suggest~~ ^{I suggest} ~~some~~ ^{some} ~~ideas~~ ^{ideas} ~~with~~ ^{with} ~~the~~ ^{the} ~~area~~ ^{area}

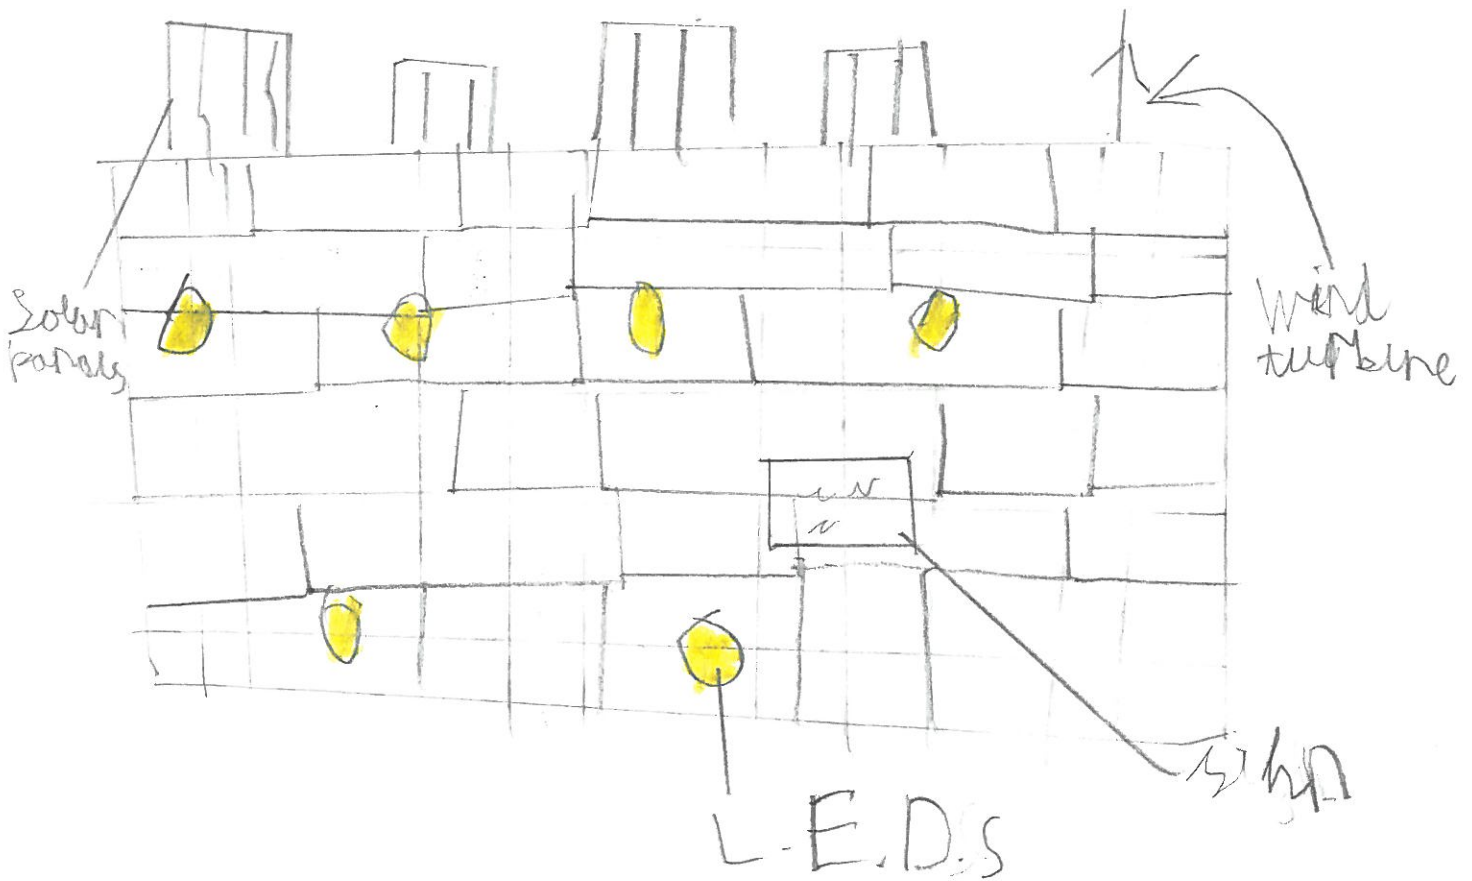

Zachary

P.S. I strongly recommend electric cars.

Zachary

The wall

The wall ~~has~~ has L.E.D. lights attachment. overhead lamps as an way. So we thought of this wall, but the disadvantage is the lamps might overheat. So I strongly advise you to put a "Do not touch" sign. The lights might take up energy so we could put on solar panels on, and when it gets ~~sooty~~ we could attach a wind turbine.

What a brilliant design for a wall! Well done!

Dear contributors,

In class we have been taking about
the new street we have been looking
for a new name we have all different
names. Also we have seen designs
of road for the future. We made
sold houses, phone, cars and some
off lights and some cars
to speaking ^{our fumes} systems and make
Elkesley a safe world for
to play. We will be making a
will ^{make it} better for the future. ✓

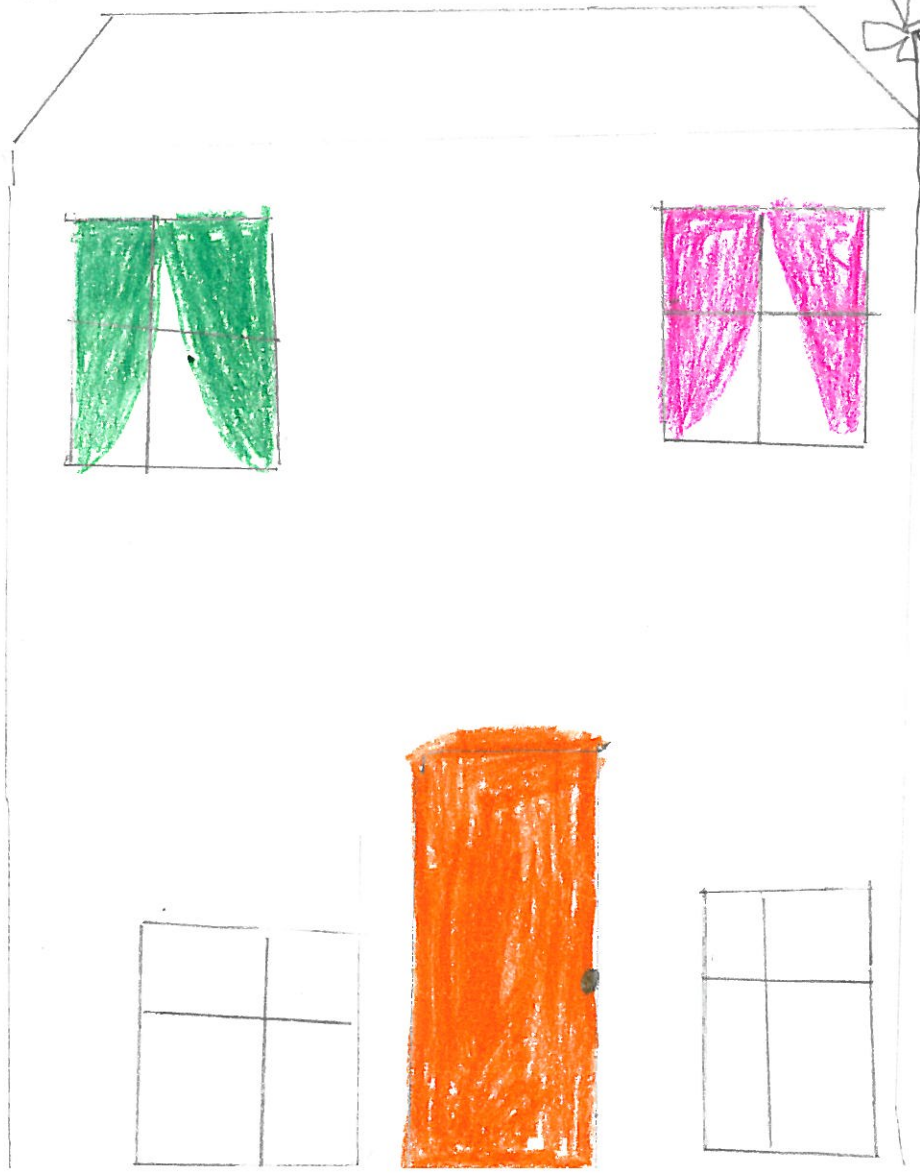

Good girl Tacey. You have really
considered putting across the environmental
friendly ideas.
Well done!

Tacey

Introduction

I have been designing a solar panel house. They were no fire the heat comes from the Sun that's why it has windows in the roof they are called solar panels they have a different shaped roofs to a normal one it has a windmill so when it is sunny you can get electricity the windmill controls the wind.

What a Super idea.

Elksey The Street of the Future

The old peoples crossing is for old people that can't walk very fast. The normal crossing is for prams and pushchairs and for people the green light stays on for longer.

The light ^{that has} has power from the sun so that it can work all night long. Also the light can move into any passishen and when its foggy it can bend down loo!
Inside the light there are some little lights too! They come on at the same time as the big one!

Your design is super.
Well thought out.

Dear Councillors,

In Class 2 we have been making our own street. I hope you like ^{it} (them)! Now here we go. We thought ^{you could} (we) ~~could~~ build some more houses with some special shapes, oh and also different shaped houses too.

Also we thought of different street names ^{for} (to) the new street we are working on.

Now, we mainly were talking about lights! We thought of lights that were in walls especially! If you like our suggestions we would like to thank you! And also, we were happy thinking about childrens cycle path too!

Your style is very informal. Can you finish with two formal sentences please!

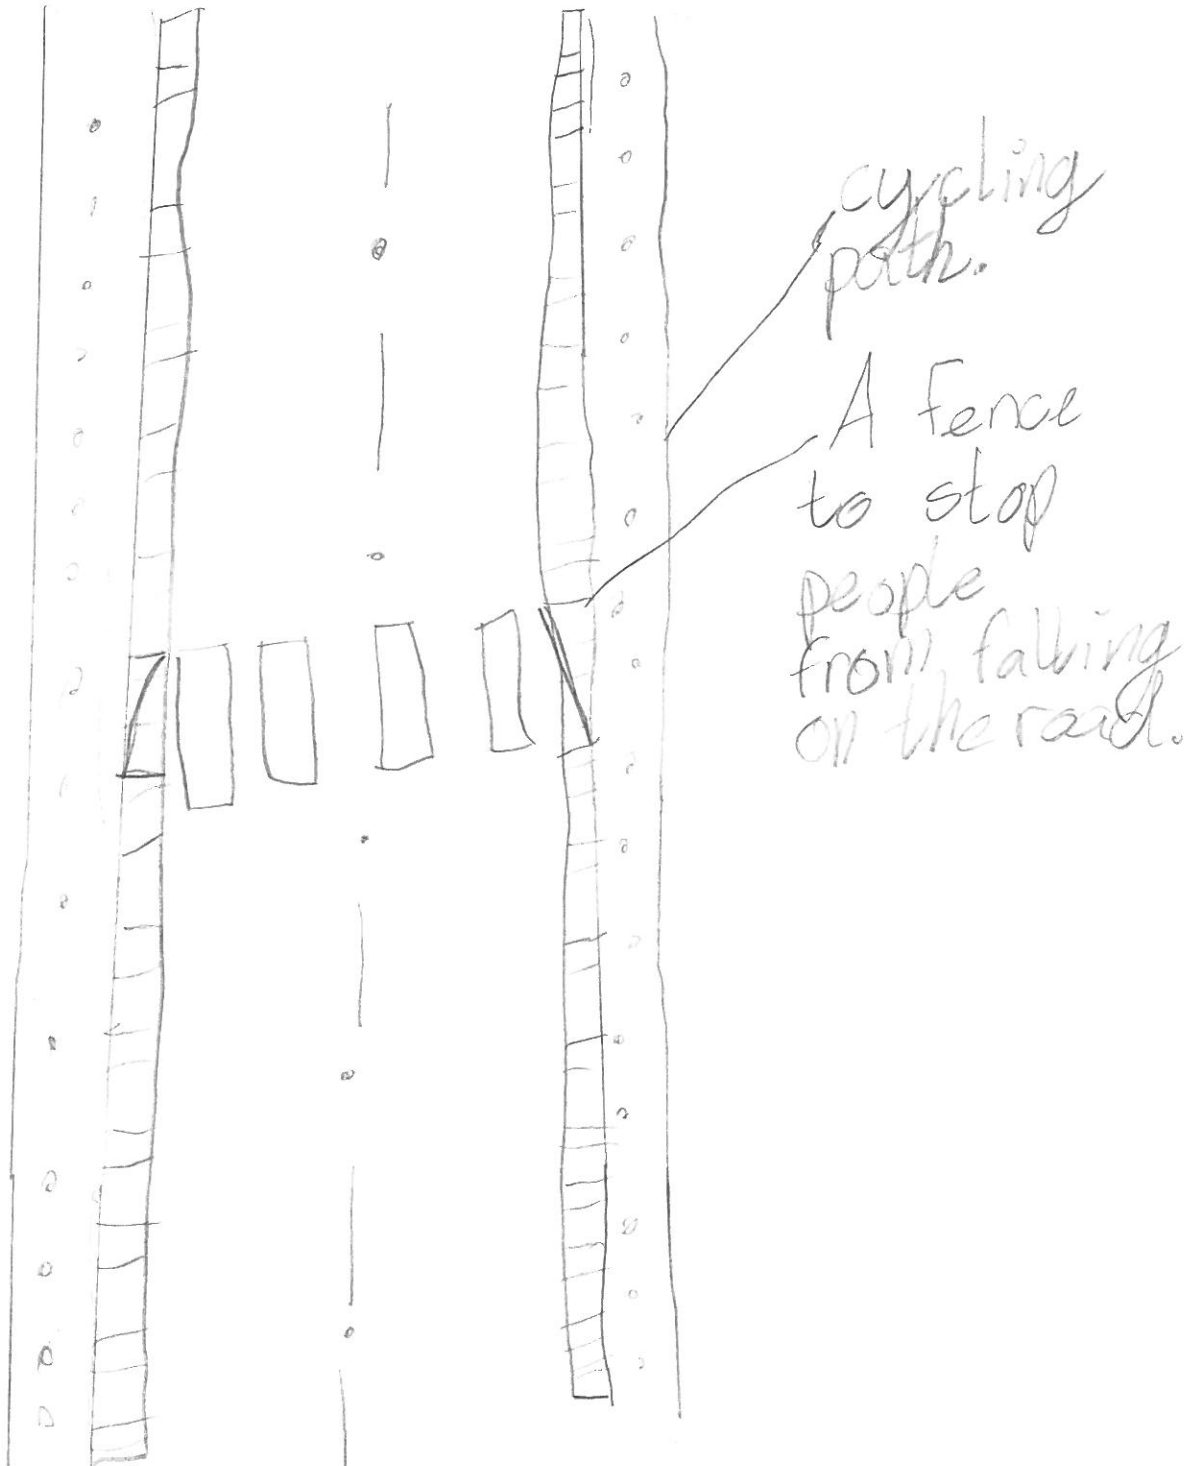

We had the idea of doing some new houses. Also we thought about another thing, we thought of a new indoor play area.

Much better. Thank you for taking your work to the next level Gyn.

Your letter has some super ideas. Well thought out!

Elkesley The Street of the Future Eryn

Child friendly cycle path

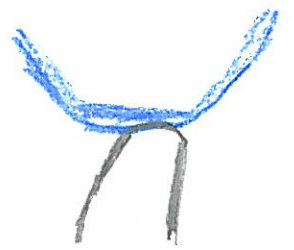

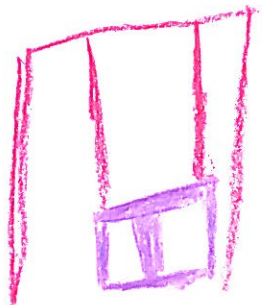

In the picture there are some cat's eyes on the cycling path. There are some electronic gates and they will open when there are no cars coming!

Don't forget to write

Dear Mr. [unclear]

In year 2 we have been planning
some ideas about the new road and
read ~~through~~ through at roads of the future.
You might like to ^{ease} please can you make
some. And we have done some work for
you thinking of ideas that might
help you

Yours truly

Do you think you could
name a couple of the ideas
please Jay? .

When done so far .

Jay

I have thought of a idea got street names
because little kids that cant read or people
that have problems so I thought of a pttener
as well people can see it more
and when people or in cars may might
miss it so it has a solar eye to light it up.

Child's Name Jay Simpson

Dear Mr Woodcock

In our class we have been
framing some ideas to help
you with the road bridge
at Elkesley. I think
that you should build a bridge
for the new road.
We need a bypass over
the A1 to keep us safe.

Supported Work.

Thank you for completing this
work Oliver.

Headford Avenue Rebecca
14th or 15th September 2013

DN22 8AQ

A super independent effort Rebecca.

You have highlighted the need for the new bypass.
Can you tell me two things you would like the new street to have?

- Dear councillors in class 2 we have been doing work about ~~Elkesley~~ Elkesley the village of the Poocher and we have been doing things we've been doing about roads hoses and lights. The street is going to be new. The new things that is going to be a bridge of the A1 because it will be safe for children over the bridge. The children are in are it is safe to cross over the road to the other side.

There are some people as dut.
of had ~~the~~ Rebecca

Dear cancelloes
Class 2 have done some
work. Would you bild more hoses
with solar panels please
So we do not have to pay
so ~~an~~ ^u much money ^{for} OS the
bills.

A very good point Chloe.
Solar panels in the new houses would
be a great idea.

Chloe

Street names

I have chosen Rainbow Street,
Because I like the name
and because ~~that~~ it would
help people that can not read
~~at~~ and can not see it properly.
That is why I have a picture on
it so that people can read
the picture if they can not read
the writing.

Ra

I think this
is a super
idea for
new street
signs.
Well done!

So bright
So people
can see
it.
